Meeting records  Transcript

Summary

The team reviewed article structure and editorial processes while establishing a timeline for finalizing content contributions.

Article Review Strategy

The group prioritized individual reading to consolidate feedback for publication on the alliance site. This approach allows the document to progress toward the final stage.

Final Editorial Workflow

Marketing will manage final copy editing to streamline production. This decision removes the need for internal final polishing of the document.

Content Tone Adjustments

Suggestions were made to soften language regarding operational standards to reflect an exploratory nature. Artificial Intelligence usage in drafting necessitated readability improvements.

Decisions

Aligned

- **Article conclusion language updated** The article conclusion language is modified to state 'areas the group is exploring' rather than definitive project lists, providing the group with flexibility regarding future research.
- **Future research planning strategy** The team decided to finalize the current article for the marketing team and collaborate asynchronously over the next two weeks to define the next 3-5 research topics and working group goals.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Dylan Valade] Submit Pull Request: Submit the final article edits as a pull request.
- ☐ [Everett Zufelt] Publish Article: Merge the proposed edits and send the finalized articles to the marketing team.

- ☐ [The group] Plan Research: Discuss and propose potential research topics or work plan goals in the Slack channel.

Details

- **Meeting Opening and Attendance:** The participants convened for their third session, noting that Jen was unable to attend due to an offsite team event. Rebecca Veldon and others noted that several team members were unavailable due to travel or being out of the office ([00:00:04](#)).
- **Proposal for Article Review:** Dylan Valade proposed that the group dedicate the meeting time to individually read the article authored by Ryan Lunka, which had been shared in Slack. The goal was to consolidate final feedback during the session, allowing the team to move the document to the next stage for publishing on the alliance site ([00:02:18](#)).
- **Article Structure and Editorial Process:** The group discussed the format of the article, which is divided into three sections. Everett Zufelt expressed approval for this structure, noting it is more digestible. It was established that Lauren and Anelie from the marketing team at the alliance would handle final copy editing, removing the need for this group to perform the final polishing ([00:04:21](#)).
- **Feedback and Review Timeline:** To keep the project moving, Everett Zufelt proposed setting a firm deadline for feedback. The participants agreed to submit their input by the end of the day or first thing the following morning, allowing Everett to merge the edits and forward the final version to the marketing team ([00:06:32](#)) ([00:26:57](#)).
- **Content Refinement and Tone:** Everett Zufelt provided feedback on the conclusion of the third article, suggesting the language be softened to reflect that the group is "exploring" certain areas, such as governing frameworks and operational standards, rather than stating them as definitive commitments. Ryan Lunka agreed with this approach, noting it was more practical than trying to define a finalized list at this stage ([00:07:38](#)) ([00:12:35](#)).
- **Artificial Intelligence and Drafting:** Ryan Lunka noted that they utilized artificial intelligence to assist with the research and the drafting of the article, confirming that they verified the reliability of the sources provided by the AI. Ryan also

acknowledged that some sentences in the draft were complex and would require editing for better readability ([00:04:21](#)) ([00:09:18](#)).

- **Future Work and Goal Setting:** Everett Zufelt suggested that the group establish a concrete long-term goal or milestone to better organize their future work, pointing to the example of the tech group, which organized their efforts around a day-long hackathon for agents at MockX in Amsterdam. The group agreed to discuss and generate ideas asynchronously in their Slack channel to determine what specific objectives they might pursue in the coming months ([00:26:57](#)).

You should review Gemini's notes to make sure they're accurate. [Get tips and learn how Gemini takes notes](#)

*How is the quality of **these specific notes**? [Take a short survey](#) to let us know your feedback, including how helpful the notes were for your needs.*

Agent Ecosystem Working Group 2: Agent Adoption and Operations - MACH Alliance - Transcript

00:00:04

Dylan Valade: Hi Rebecca.

Rebecca Veldon: Hello. How are you doing? I'm just catching up on all of my

Dylan Valade: Good.

Rebecca Veldon: notes. Is this our second or third session? Ellen.

Dylan Valade: This is our third.

Rebecca Veldon: Hey, I just wanted to make sure I wasn't losing the

Dylan Valade: Now, um I haven't been able to focus on it.

Rebecca Veldon: plot.

Dylan Valade: I've been kicking off a big project at work and now things are calming down, which is good. So,

Rebecca Veldon: Yeah.

Dylan Valade: I can get back to some focus here. Tom,

Tomasz Pindel: Hang on.

Dylan Valade: excuse me.

Rebecca Veldon: Hello.

Tomasz Pindel: Oh,

Dylan Valade: All right.

Ryan Lunka: Hey, that's what we're

Tomasz Pindel: hey

Rebecca Veldon: Thank you.

Dylan Valade: Good.

Everett Zufelt: Hey, good morning everyone.

Dylan Valade: Hey,

Rebecca Veldon: Good

Dylan Valade: Rick.

Tomasz Pindel: Good morning.

Dylan Valade: All

Everett Zufelt: I don't think Jen is going to be able to join today. Um I think they're at an offsite with the team.

Dylan Valade: right.

Rebecca Veldon: Yeah, we had quite a few people who can't make today cuz they're out of the office.

00:02:18

Rebecca Veldon: I'm wondering if quite a few people have gone to shop talk. We'll give it a few more minutes and then we'll crack on.

Everett Zufelt: probably kick things off.

Dylan Valade: Amazing.

Everett Zufelt: Uh, Rebecca,

Rebecca Veldon: Sorry. What was that?

Everett Zufelt: I think we can probably kick things

Rebecca Veldon: Yeah.

Everett Zufelt: off.

Rebecca Veldon: Sorry. Over to you.

Everett Zufelt: And I'll probably be a bit I'll be a bit quieter today because I'll get in a car uh in transit to the airport for

Rebecca Veldon: Go.

Everett Zufelt: my trip to London.

Dylan Valade: All

Rebecca Veldon: Oh no, I see this

Dylan Valade: right.

Rebecca Veldon: now.

Dylan Valade: Okay. Sure.

Rebecca Veldon: All righty.

Everett Zufelt: So,

Rebecca Veldon: Dylan, did you want to take us away?

Dylan Valade: Um, kids are out of school as of yesterday, so I've got some helpers at home. May hear them in the background. Uh we've got um the article that Ryan B has authored that looks great and every you mentioned in Slack. It'd be good if we can make sure that basically today we've got final feedback on that.

00:04:21

Dylan Valade: And so I guess what I'm kind of thinking is maybe we should just take this time right now and read individually and then if anybody has anything they want to change we bring it up and if there's no changes then we plan to move this to the next stage for publishing on the alliance site. That' be my proposal for the time. Any thoughts?

Rebecca Veldon: That makes sense. What about you,

Ryan Lunka: I already read

Rebecca Veldon: too?

Dylan Valade: Okay,

Ryan Lunka: it.

Dylan Valade: I'm sure

Ryan Lunka: It was um he heavily AI system too. So if you see anything in there, it's like that sounds like AI, we can tweak it.

Dylan Valade: Thomas

Ryan Lunka: I cleaned a lot of it up myself and it's, you know, it's always a balance,

Everett Zufelt: It it I think I think it's quite good. Uh I like having it broken into the three pieces. I think it a because with my marketer hat on I just more is better. Um I also just think it's more digestible just for awareness.

00:05:30

Everett Zufelt: uh Lauren and Anelie who on the marketing team at the lock alliance that they'll go through this and like do like a copy edit like they won't change the meeting but they'll tweak it up for us so we don't have to this group of people doesn't have to be the final copy edit

Dylan Valade: Perfect. All right. So, Tomas, have you had a chance to read through it all?

Tomasz Pindel: Unfortunately, no. Sorry, but I'm I'm just catching up.

Dylan Valade: Okay.

Tomasz Pindel: So, uh, practically speaking,

Dylan Valade: Yeah, not a problem.

Tomasz Pindel: I open this article. So, so we'll be reading that.

Dylan Valade: Okay. So, and I've I read through the first when it was one, I read through the maybe 60% of it. So, um as I'll do right now is just skim through that first one. Uh and then read the parts two and three. But I think it's looking good. I also do like splitting it up as well. And if the copy edits are going to be made by the marketing team, even better.

00:06:32

Dylan Valade: So really just looking for the meat of it and then we don't have any points that I guess I disagree with. But so far so good.

Everett Zufelt: Do do we want to set a time frame on this so that just like hey all input by X will be delayed will be accepted after that we're just going to move forward and publish. It does like is end is end of the day today reasonable or

Dylan Valade: I would say I I would be more in favor of the

Everett Zufelt: no?

Dylan Valade: next 20

Everett Zufelt: There we go.

Dylan Valade: minutes.

Everett Zufelt: I I think that like yeah like I I'll mean I'll let the team know that first thing tomorrow morning whatever's in is good to go.

Dylan Valade: Hi Tim.

Tim Steele: What's going on? Sorry I'm late. I see you have Ryan though. That's the real brains of the operation from Aries. So,

Dylan Valade: Yeah. Uh the thing we were discussing is that we would read through Ryan's article and just take the time right now read through the three sections and give any feedback and

00:07:38

Everett Zufelt: Yeah.

Dylan Valade: if we've got any significant changes we make them otherwise this moves from our group into the marketing team for actually final copy edits and publishing on the alliance So

Everett Zufelt: The only the only feedback I had is I didn't make any edits.

Dylan Valade: happiness.

Everett Zufelt: Uh I and I think I maybe shared this in Slack. The the tail end of the third article. Uh I like that it gives direction of where what the working group's going to do. I don't and maybe I'll go back and read it now. It feels kind of tight like this is what we're doing versus here's some of the areas we're exploring just to give ourselves a little bit more room. But otherwise, I think the all of the rest is fair. There we go.

Ryan Lunka: reviewing that part. Talk about the why frameworks are the organizational mechanism part or the conclusion.

Dylan Valade: Let's

Tim Steele: I'm looking and I don't see an article. So maybe did I miss something?

Dylan Valade: drop a link here.

00:09:18

Tim Steele: So yeah, I was checking the invite. I was checking my email. So just making sure because you know I don't always want to be that person But

Dylan Valade: Sorry, I also should have clarified. Please ask or speak up if anybody doesn't have it. I just put that in the chat. So, there's um there's three uh markdown files in this folder. Let me know if you can get that, Tim.

Tim Steele: Uh yeah. So part one mental. So what actually changed mental models moving through? So reading all three

Dylan Valade: Yeah. So it was one article and split up into

Tim Steele: sounds good.

Dylan Valade: three.

Ryan Lunka: Yeah, this could definitely use some copy editing now that I'm reading it with some space. There's definitely some sentences that are longer and more complex than are ideally readable. There's a few like like they distribute the insight as like a that sentence is useless. It could be removed stuff like that.

Dylan Valade: So it does say the governing frameworks, operating models and operational standards this group's working on.

00:12:35

Dylan Valade: Um, so just confirm we those are the things we're going to work

Everett Zufelt: I think either that or we can just say,

Dylan Valade: on.

Everett Zufelt: "Hey, here's areas that we're exploring." Like, we can either There's two I think there's two there's three, I guess, ways to resolve the tension. A, who cares? Nobody's going to make it that far down the article. B, uh, B is ensure we know exactly

what the right list is, or or C is just soften the language areas the group is exploring includes. Now, we're not tying ourselves to anything definitively.

Dylan Valade: Perfect.

Ryan Lunka: I don't think B is the practical answer deciding and setting in

Everett Zufelt: I I I agree. I agree with you.

Ryan Lunka: stone.

Everett Zufelt: I It's It's A or C. Yes, I agree.

Dylan Valade: All right. areas. This group is exploring this area. This group this group is expiring exploring my frameworks every models and operation standards. wonder if there's any 2026 research to um identify

Ryan Lunka: Yeah, I didn't uh I didn't spend too much time on the citable sources other than just verifying.

00:16:05

Ryan Lunka: I mean, I used AI to do those research articles. I just basically here's the point I'm trying to make.

Dylan Valade: Yep.

Ryan Lunka: what data backs it up if there's any out there. So, I just double check that they didn't make s*** up, but um yeah,

Dylan Valade: Good. And they're good

Ryan Lunka: there there may be more may yeah,

Dylan Valade: sources.

Ryan Lunka: they seem pretty reliable to me. They weren't they weren't like obviously I'm sensitive, I guess, for lack of better words. We have an interesting question for you guys when we are reading about um what extent collectively activities.

Dylan Valade: Oh my god.

Ryan Lunka: Just checking. Are we still reading?

Dylan Valade: I am getting to the uh getting the end of the third article now. I've been making some edits and then I'll submit it as a poll request. Nothing major and then I do need to drop in five minutes.

Everett Zufelt: So,

Dylan Valade: Mhm.

Everett Zufelt: so m thought would be then maybe for this week like hey you I'll go back through the edits I'll take a look I'll share these three articles to the marketing team but hey check the box we got the first thing done asynchronously maybe over the next two weeks I think we can work together on what do we want the next three to five things to be right what are the what are the research topics what are the areas of exploration what are the you debates probably that we need to have in order to progress this forward.

00:26:57

Everett Zufelt: Something to bear in mind and I don't know if it will work the same for this group as it did for the tech group. Um I think maybe giving ourselves a goal could help like what are we working toward? they picked they want to do a dayong hackathon around agents at MockX in Amsterdam and so now they're organizing their work around hey what do we need to do in the next four or five months to make that real and so maybe something for this group to consider and just toss out crazy ideas in the Slack channel uh is what what might that same and whether it's mock or something else what might a goal be that we and kind of be building a work plan to work toward and so and I think we can bat some ideas around that uh asynchronously.

Dylan Valade: That sounds good to me.

Everett Zufelt: Does that work for everyone?

Tim Steele: Yeah, that's

Ryan Lunka: Yeah, sure.

Everett Zufelt: Awesome. All right. So, maybe we can all drop off and then I'll I'll check end of day today or first thing. It's a blur because I'm headed to London, so I don't really know what ways up time zones and hours of the clock, but at some point in the next 24 hours, uh, I'll go check merge in the edits, uh, and get it over to the marketing team.

Dylan Valade: All right. Thank you, Everett.

Everett Zufelt: Awesome. Well,

Dylan Valade: Thanks, Ryan.

Everett Zufelt: thank

Tomasz Pindel: All right,

Tim Steele: Thanks everybody.

Tomasz Pindel: you're up.

Ryan Lunka: Yes.

Tomasz Pindel: Bye.
